# Mohammad Yekrangian

832-715-4671 | mohammad.yekrangian@outlook.com

## Professional Summary

Experienced Cybersecurity Solutions Architect specializing in AI/ML integration with a strong track record in designing secure development lifecycles. Skilled in threat modeling, CI/CD pipelines, and cloud-native computing, leveraging extensive knowledge of cybersecurity frameworks to enhance organizational security posture. Proven leader in fostering cross-functional collaboration to drive innovation and secure AI/ML applications.

## Work Experience

### Sr. Lead Cybersecurity Solutions Architect – Applied AI/ML | JPMorgan Chase & Co

*June 2022 - Present*

- Spearheaded the design and provisioning of scalable infrastructure for AI/ML applications, ensuring compliance with OWASP and MITRE ATLAS guidelines.
- Integrated ML model deployments with CI/CD pipelines using Terraform and Jenkins, enhancing microservices deployment on AWS EKS.
- Developed comprehensive pipelines for NLP-driven applications, improving cyber threat intelligence through MITRE ATT&CK frameworks.
- Collaborated with cross-functional teams to identify high-impact AI/ML use cases, driving efficiency and innovation in threat analysis.

### Security Architect – API Security | JPMorgan Chase & Co.

*December 2021 - May 2022*

- Proposed and implemented security policies for AWS resources using Terraform, ensuring secure application integration.
- Developed security configuration baselines and threat models to protect AWS products against potential threats.

### Security Solutions Architect | IBM CFO (Finance and Operations)

*July 2020 - November 2021*

- Implemented data security solutions and anomaly detection analytics for sales and finance databases.
- Developed secure remote development environments and applied machine learning to detect unauthorized access.

### Lead Security Architect | IBM CISO (Security Operation Center)

*July 2018 - June 2020*

- Led the design and delivery of security solutions for IBM SOC tier 3, focusing on security monitoring and analytics.
- Facilitated Agile Scrum practices to prioritize tasks and foster team collaboration in security initiatives.

## **Network Systems Engineer | Santanna Energy Services**

*December 2017 - July 2018*

- Implemented Multi-Factor Authentication and security dashboards to enhance user login activity monitoring.
- Designed network segmentation strategies to improve security and operational efficiency.

## **Skills**

**Technical Skills:** AI/ML security, CI/CD pipelines, Terraform, Jenkins, AWS EKS, NLP, Threat Modeling

**Tools & Technologies:** PowerShell, Python, Docker, Kubernetes, IBM Qradar, ELK Stack, FastAPI

**Soft Skills:** Leadership, Cross-functional collaboration, Analytical problem-solving, Strategic planning

## **Education**

**Post Graduate Program, Artificial Intelligence and Machine Learning | The University of Texas at Austin**

*2021*

**AAS Cyber Security | Houston Community College**

*2014*

**B.Sc. Software Engineering | Azad University of Iran**

*2009*

## **Certifications**

### **AWS Training:**

- Advanced Architecting on AWS
- AWS Well-Architected Best Practices
- Security Engineering on AWS

### **Microsoft Certifications:**

- MTA: Security Fundamental

## **Projects**

## **Auspex: Building Threat Modeling Tradecraft into an Artificial Intelligence-based Copilot**

- Published an academic paper demonstrating innovative AI-based threat modeling techniques. Available at: [arXiv:2503.09586](https://arxiv.org/abs/2503.09586)
